DESCRIPTION

- I am Le Quoc Thang, recent graduate of the full-stack development course at CodeGym Center in Da Nang.

- **My previous profession:** I graduated from the Department of Refrigeration and Air Conditioning at Da Nang University of Technology, and I worked as a refrigeration and air conditioning engineer for 5 years before transitioning to a new career..

- **Achievements during the course:** In the first two months at CodeGym Da Nang, I consistently secured the top position on the center's leaderboard. By the third month, I participated in the national algorithm competition, Hackathon, and achieved the runner-up position.

- **Past professional achievements:** I received the project award in 2019 and was recognized as an outstanding employee in 2020 at Searee Company.

With the acquired expertise, I am confident in my ability to handle any assigned tasks efficiently. Moreover, with 5 years of experience working on various projects and collaborating with leaders and different departments, I believe in my capacity to handle pressure, manage tasks effectively, and adapt to diverse challenges. I am eager to contribute my skills and experiences to the dynamic environment of your company and look forward to the opportunity to discuss how I can be a valuable asset to your team.

Best regards.

DESIGNATION & AWARD

Second Prize in the National Algorithm Hackathon
2023

Employee of the Year - Searee company
2020
Project of the Year - Searee company
2019

WORK EXPERIENCE

2022 - 2023
DOANNHAT JSC M&E PROFESSIONAL CONTRACTOR
M&E Engineer - Shopdrawing

2018 - 2022
SEAREE REFRIGERATION ELECTRICAL ENGINEERING CORPORATION
M&E Engineer - BIM Manager

2013 - 2018
DANANG UNIVERSITY OF SCIENCE AND TECHNOLOGY
Electrical Refrigeration

PROJECT

Duration - 2 weeks

LQT Service

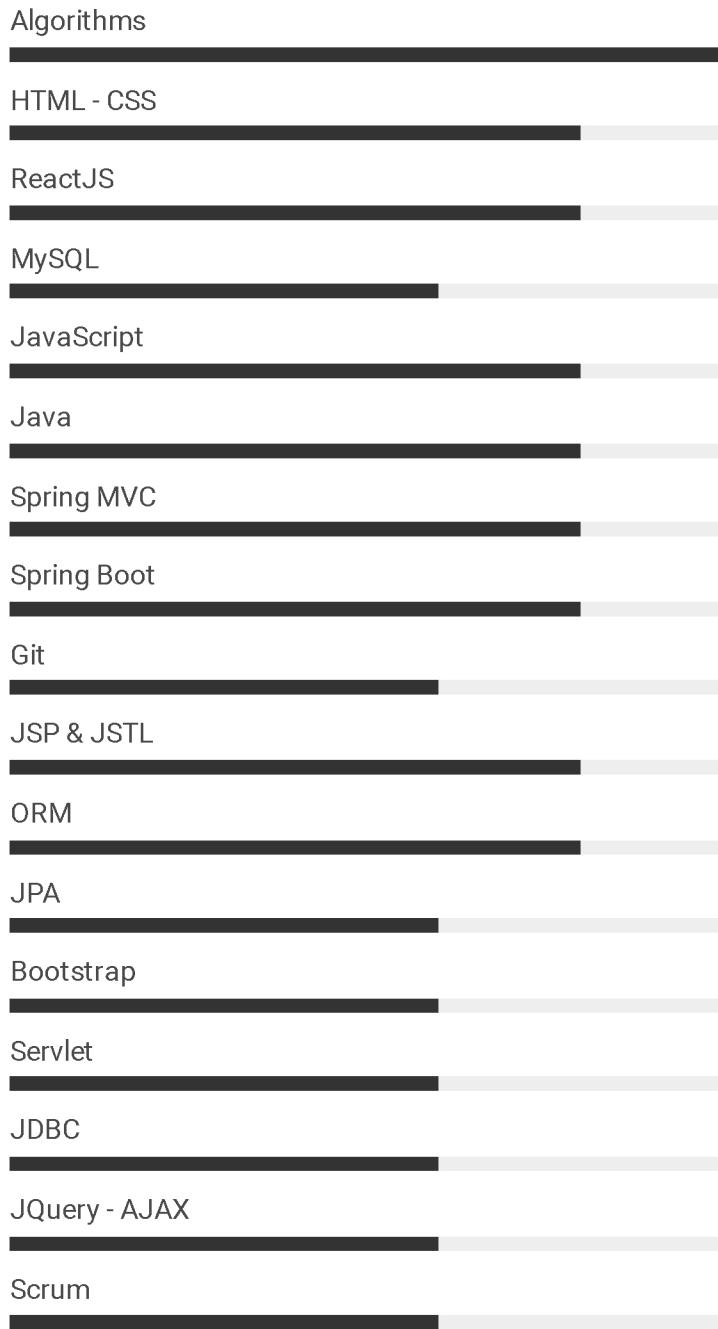

role - Programmer

- A project that connects individuals in need of electrical and plumbing repairs with skilled technicians.
- Utilizes a 3D model of the ThangQuoc Apartment, enhancing the user experience through the combination of CSS and JS to create an interactive 3D environment.
- Incorporates a time management feature linked to a 3D map, facilitating easy tracking of job assignments and convenient navigation.
- Real-time chat technology enables seamless communication for administrators, users, and employees. Implements Redux to synchronize states across various components.
- Ensures security through JWT (JSON Web Tokens), allowing for easy scalability across different device platforms

Technologies: Revit, Enscape, Photoshop, Firebase storage, Firebase Realtime Database, React JS, Redux, JSX, Spring Boots, ORM, Hibernate
